### **Appraisal and mandatory training**

NHS Annual appraisal up to date  
NHS Mandatory Training up to date

### **Medico-legal experience**

I have 7 years' experience in writing expert witness medical reports, mainly for the civil and family courts, but some cases for criminal and coroner's courts. Over the last 3 years I have been instructed by the claimant (27%), defendant (29%), coroner (2%), NHS (4%) and as a single joint expert in 38% of cases.

I obtained the Cardiff University Law School Expert Witness Certificate (Civil) in 2018.

I have given evidence under cross examination both in person and virtually, especially in family, criminal and coroner's cases which tend to go to court.

I am a general dermatologist, practicing both on the NHS and in private practice, with a case mix of skin cancer, inflammatory skin disease and children's dermatology, although I am not a career paediatric dermatologist and I do not have expertise in cosmetic dermatology.
